Scanning Devices Inc.  
Quarter-trol Remote Correction Controls  
Part # 10-0355

Function

- Provides Differential or PIV Corrections from a remote location
- Attaches to screw terminals in the Quarter-trol Enclosure
- Equipped with cable, length up to 75 feet
- Push-button activated correction
- Red and Green indicators signal motor running and direction
- Logic Interlock prevents conflicting motor activation
- Powered from Quarter-trol System Enclosure

Wiring

Connect cable to upper eleven-position screw terminal in Quarter-trol System Enclosure. Terminals are numbered **right-to-left**. Power supply connects to 1 (Red) and 2 (Black).

Red	+ 24 Volts DC	Terminal 1
Black	Signal Ground	Terminal 2

Install for Differential **OR** PIV Correction Controls, not both

For Differential Correction

Green	Forward Correction	Terminal 6
White	Reverse Correction	Terminal 7

For PIV Correction

Green	Forward Correction	Terminal 8
White	Reverse Correction	Terminal 9
